Project Name: Import Data using Transform Maps using Spreadsheet.”

Maximum Member: 5

Team Leader:muthu lakshmi.N

Member:abi.J ,alagu nachiyar.S,Jesu snowrina.A,Muthu meenakshi.mProposed Solution

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Importing spreadsheet data manually can be time-consuming and may cause data-entry errors.
2	Idea / Solution description	Use a spreadsheet as the data source, load it into an import set, and use a Transform Map to map source fields to the appropriate target table fields.
3	Novelty / Uniqueness	Provides a structured and repeatable method to transform spreadsheet data and load it into required target records.
4	Social Impact / Customer Satisfaction	Reduces manual effort and data-entry errors, helping users complete data imports more efficiently.
5	Business Model (Revenue Model)	Supports implementation, configuration, training, and maintenance services for organizations using spreadsheet-based data migration.
6	Scalability of the Solution	The approach can be reused for different spreadsheets,

		field mappings, and target tables as data-import requirements grow.
